CELLULAR FATTY ACID-BINDING PROTEINS II

Preface 1

G. Scapin, A.C.M. Young, A. Kromminga, J.H. Veerkamp, J.I. Gordon and J.C. Sacchettini: High resolution X-ray studies of mammalian intestinal and muscle fatty acid-binding proteins provide an opportunity for defining the chemical nature of fatty acid: protein interactions 3

D. Lassen, C. Lücke, A. Kromminga, A. Lezius, F. Spener and H. Rüterjans: Solution structure of bovine heart fatty acid-binding protein (H-FABP$_c$) 15

T. Börchers and F. Spener: Involvement of arginine in the binding of heme and fatty acids to fatty acid-binding protein from bovine liver 23

K.R. Miller and D.P. Cistola: Titration calorimetry as a binding assay for lipid-binding proteins 29

G.E. Gerber, D. Mangroo and B. L. Trigatti: Identification of high affinity membrane-bound fatty acid-binding proteins using a photoreactive fatty acid 39

J. Storch: Diversity of fatty acid-binding protein structure and function: studies with fluorescent ligands 45

S. Mandrup, P. H. Andreasen, J. Knudsen and K. Kristiansen: Genome organization and expression of the rat ACBP gene family 55

J.M. Stephens, M. Butts, R. Stone, P.H. Pekala and D.A. Bernlohr: Regulation of transcription factor mRNA accumulation during 3T3-L1 preadipocyte differentiation by antagonists of adipogenesis 63

F. Schroeder, J.R. Jefferson, D. Powell, S. Incerpi, J.K. Woodford, S.M.Colles, S. Myers-Payne, T. Emge, T. Hubbell, D. Moncecchi, D.R. Prows and C.E. Heyliger: Expression of rat L-FABP in mouse fibroblasts: role in fat absorption 73

A. Mallordy, P. Besnard and H. Carlier: Research of an *in vitro* model to study the expression of fatty acid-binding proteins in the small intestine 85

R.M. Kaikaus, W.K. Chan, P.R. Ortiz de Montellano and N.M. Bass: Mechanisms of regulation of liver fatty acid-binding protein 93

J.H. Veerkamp and H.T.B. Van Moerkerk: Fatty acid-binding protein and its relation to fatty acid oxidation 101

A. Garnier, C. Poizat, C. Keriel, P. Cuchet, M. M. Vork, Y.F. De Jong and J.F.C. Glatz: Modulation of fatty acid-binding protein content of adult rat heart in response to chronic changes in plasma lipid levels 107

S. Iseki, O. Amano, T. Kanda, H. Fujii and T. Ono: Expression and localization of intestinal 15 kDa protein in the rat 113

P. A. Sellner: Retinal FABP principally localizes to neurons and not to glial cells 121

J. Knudsen, S. Mandrup, J.T. Rasmussen, P.H. Andreasen, F. Poulsen and K. Kristiansen: The function of acyl-CoA-binding protein (ACBP)/Diazepam binding inhibitor (DBI) 129

A.K. Dutta-Roy, M.J. Gordon, D.J. Leishman, B.J. Paterson, G.G. Duthie and W.P.T. James: Purification and partial characterisation of an α-tocopherol-binding protein from rabbit heart cytosol 139

D.J. Van der Horst, J.M. Van Doorn, P.C.C.M. Passier, M.M. Vork and J.F.C. Glatz: Role of fatty acid-binding protein in lipid metabolism of insect flight muscle 145

N.H. Haunerland, X. Chen, P. Andolfatto, J.M. Chisholm and Z. Wang: Developmental changes of FABP concentration, expression, and intracellular distribution in locust flight muscle 153

E.A. Meijer, S.C. de Vries, P. Sterk, D.W.J. Gadella Jr., K.W.A. Wirtz and T. Hendriks: Characterization of the non-specific lipid transfer protein EP2 from carrot (*Daucus carota* L.) 159

J.F.C. Glatz, M.M. Vork and G.J. van der Vusse: Significance of cytoplasmic fatty acid-binding protein for the ischemic heart 167

M.M. Vork, J.F.C. Glatz and G.J. van der Vusse: Release of fatty acid-binding protein and long chain fatty acids from isolated rat heart after ischemia and subsequent calcium paradox 175

P.G.A. Volders, M.M. Vork, J.F.C. Glatz and J.F.M. Smits: Fatty acid-binding proteinuria diagnoses myocardial infarction in the rat 185

N.M. Bass: Cellular binding proteins for fatty acids and retinoids: similar or specialized functions? 191
